God's Blessings Continue to Flow:

MIRACLE OF QURAN EXPLODES SOON OVERWHELMS THE WORLD

New discoveries have added even more power to the already overwhelming Miracle of the Quran.

At this stage, the Miracle is unstoppable. God's enemies who are trying frantically to oppose this "one of the greatest miracles of God" (74:35), have now plunged in a quick sand syndrome: the more they kick and scream, the more miracles are sent down from God to plunge them deeper into hypocrisy and disbelief.

A true Muslim from Nigeria, Brother Ahmed Yusuf, whom I consider to be God's ambassador to Nigeria, made the following profound discovery:

- [1] Put all suras of Quran in front of you (mentally).
- [2] Assign to Sura 1 a value of "1."
- [3] Add the number of Sura 1 to the number of Sura 2, and you get 3. Put the value of Sura 2 as "3."
- [3] Add the value of Sura 2 to the number of Sura 3 and you get "6," the value for Sura 3.
- [4] Add the value of Sura 3 to the number of Sura 4 and you get "10," the value of Sura 4.
- [5] Add the value of Sura 4 to the number of Sura 5 and you get "15," the value for Sura 5.
- [6] Go on doing the same thing for all suras of the Quran. Now you have a value for every sura.
- [7] Separate the 29 initialed suras. These suras and their values are as follows:

 Sura 2=3 3=6 7=28 10=55 11=66 12=78
 13=91 14=105 15=120 19=190 20=210
 26=351 27=378 28=406 29=435 30=465
 31=496 32=528 36=666 38=741 40=820
 41=861 42=903 43=946 44=990 45=1035
 46=1081 50=1275 68=2346.

[8] Add the values for all 29 initialed suras, and you get 15675, which is a multiple of 19 (15675 = 19x825).

[9] Add the values for the 85 un-initialed suras and you get 237785, which equals 19x12515.

ALLAHU AKBAR.

Congratulations to Brother Ahmed Yusuf.

Brother Ahmed Yusuf was also guided by God to make a number of observations and profound discoveries. For example, he looked at the 14 let-

ters that make up the various sets of Quranic initials, namely, A, L, M, S (Saad), R, K, H (Ha), Y, 'A ('Ayn), T, S (Seen), H, Q, and N. He then multiplied the frequency of occurrence of each letter by its gematrical value. For example, the letter A (Alef) occurs 17152 times in its 13 initialed suras. You multiply 17152 by "1" which is Alef's gematrical value. You do this with every Quranic initial, and the grand total is added to the total occurrence of the 14 sets of initials, and the sum of totals comes to 1089479, which equals 19x57341.

The following new discovery is yet another huge nail in the coffin of the false injections 9:128-129:

- [1] Take all the verses from the missing "Bismillah" of Sura 9 to the extra "Bismillah" of Sura 27.
- [2] Add the sura number to its number of verses. Remember to take the true number of verses of Sura 9, i.e., 127, and only 29 verses from Sura 27, since the extra "Bismillah" occurs in 27:30.
- [3] Add the sum of verse numbers for each sura (1+2+3+...+n, where n=the number of verses in the sura).
- [4] The grand total for all the verses, from 9:1 to 27:29 is 119966, or 19x6314.

Sura No.	No. of Verses	Sum of Verse #s	Grand Total
9	127	8128	8264
10	109	5995	14379
11	123	7626	22138
12	111	6216	28477
13	43	946	29479
14	52	1378	30923
15	99	4950	35987
16	128	8256	44387
17	111	6216	50731
18	110	6105	56964
19	98	4851	61932
20	135	9180	71267
21	112	6328	77728
22	78	3081	80909
23	118	7021	88071
24	64	2080	90239
25	77	3003	93344
26	227	25878	119475
27	29	435	119966

This discovery is the work of Abdullah Arik.

HOT OFF THE COMPUTER

NEW DISCOVERY

Consider the 14 letters that participate in the Quranic Initials: A (Alef), L (Lam), M (Meem), S (Saad), R (Ra), K (Kaf), H (Heh), Y (Ya), 'A ('Ayn), T (Ta), S (Seen), H (Haa), Q (Qaf), & N (NuN). Add the gematrical value of each letter to the number of the first sura where the letter appears as an initial. The grand total is 988, 19x52:

Initial Letter	Gematrical Value	+	First Sura Where it Occurs
(Alef)	1	+	2
(Lam)	30	+	2
(Meem)	40	+	2
(Saad)	90	+	7
(Ra)	200	+	10
(Kaf)	20	+	19
(Heh)	5	+	19
(Ya)	10	+	19
('Ayn)	70	+	19
(Ta)	9	+	20
(Seen)	60	+	26
(Haa)	8	+	40
(Qaf)	100	+	42
(NuN)	50	+	68
	693	+	295

$693 + 295 = 988 = 19 \times 52$.
 Also: $693 + 29$ (initialed suras) $= 722 = 19 \times 19 \times 2$.

NEW DISCOVERY

- [1] In the first column, put the 14 letters of the Quranic Initials. See Table below.
- [2] In the second column, put the number of occurrences of the letter as an initial. For example, the letter "A" (Alef) occurs as an initial in 13 suras.
- [3] Add the number of suras where this letter occurs as an initial, plus their numbers (2 + 3 + 7 + ...).
- [4] The grand total is 2033, or 19x107.

Initial Letter	No. of Occurrences	Total of Sura #s	Cumulative Total
(Alef)	13	209	222
(Lam)	13	209	444
(Meem)	17	502	963
(Saad)	3	64	1030
(Ra)	6	75	1111
(Kaf)	1	19	1131

H (Heh)	2	39	1172
Y (Ya)	2	55	1229
'A ('Ayn)	2	61	1292
T (Ta)	4	101	1397
S (Seen)	5	159	1561
H (Haa)	7	301	1869
Q (Qaf)	2	92	1963
N (NuN)	2	68	2033

$2033 = 19 \times 107$

NEW DISCOVERY

All these discoveries, by the way, are Abdullah Arik's---unless otherwise specified.

- [1] Take the 29 initialed suras.
- [2] Add the sura number + the gematrical value of its initials (A.L.M. value = 71, for example).
- [3] Add the total gematrical value of all initials in the sura (for "A" in Sura 2, 4502x1 & for "L" it is 3202x30, & so on).
- [4] Do this for all 29 suras.
- [5] The grand total is 1051726, or 19x55354.

NEW DISCOVERY

- [1] Take all 14 Quranic Initials.
- [2] Add the sura number where the letter occurs as an initial + the verse number where it occurs + the frequency of occurrence of the letter in the sura + the number of the first sura where it occurs + the total gematrical value (for example "A" occurs in 13 suras, & the total gematrical value would be 13x1 = 13).
- [3] The Grand Total for all letters in the 29 initialed suras is 47158, or 19x2482.

The Following New Discoveries Were Made by Brother Mahmoud Abib of Masjid Tucson:

- [1] Assume that Sura 9 consists of 129 verses.
- [2] Take all suras which contain Verse 129 (Suras 2, 3, 4, 5, 6, 7, 9, 20, 26, & 37).
- [3] Add the sura numbers; you get 114.
- [4] Add the 129 verses of the 9 suras mentioned above; you get 1161.
- [5] Add 114 + 1161; you get 1275.
- [6] Remove the two false injections (9:128 & 129) and you get 1273, or 19x67. See also 1273 below.

Repeat [1] thru [5] above for all suras containing Verse 128. The Total = 1410. If you remove Sura 9 & its 128, you get a grand total of 1273, 19x67.

$1410 - (9 + 128) = 1410 - 137 = 1273 = 19 \times 67$.

MORE MIRACLES DISCOVERED

Brother Mahmoud Abib made the following additional discoveries, all of which expose 9:128-129 as false injections. Sura 9 consists of 127 verses:

[1] Take all the suras where the number of verses ends with the digit "7."

[2] You will find 7 such suras. These 7 suras and their number of verses are shown below:

Sura Number	Number of Verses
1	7
9	127
25	77
26	227
45	37
86	17
107	7
299	499

$$299 + 499 = 798 = 19 \times 42$$

Of course, if Sura 9 had 129 verses: no miracle.

NEW DISCOVERY

There are specific suras where the digits of the sura number and the number of verses add up to "19." The first sura in this group is Sura 9. Since the number of verses in this sura is 127, the digits $9 + 1 + 2 + 7 = 19$. The other suras that possess this quality are Sura 22 (78 verses), 26 (227 verses), 45 (55 verses), 64 (18 verses), 72 (28 verses), 77 (50 verses), 78 (40 verses), and Sura 84 (25 verses). When you add all the sura numbers and the number of verses in them, the total comes to 1216, or 19×64 . You can easily see that if Sura 9 had 129 verses, the whole system would collapse.

NEW DISCOVERY

There are certain suras where the number of verses consists of 3 digits. These suras and their number of verses are: 2 (286 verses), 3 (200), 4 (176), 5 (120), 6 (165), 7 (206), 9 (127), 10 (109), 11 (123), 12 (111), 16 (128), 17 (111), 18 (110), 20 (135), 21 (112), 23 (118), 26 (227), and Sura 37 (182 verses). When we add the sura numbers of all these suras ($2 + 3 + 4 + 5 + 6 + 7 + 9 + 10 + 11 + 12 + 16 + 17 + 18 + 20 + 21 + 23 + 26 + 37$), we get 247, or 19×13 . Now, let us add the last digit in all the verse numbers (6

$+ 0 + 6 + 0 + 5 + 6 + 7 + 9 + 3 + 1 + 8 + 1 + 0 + 5 + 2 + 8 + 7 + 2 = 76 = 19 \times 4$. Of course, if Sura 9 has 129 verses, this phenomenon would disappear.

NEW DISCOVERY

[1] Sura 9 is an un-initialed sura. Take all 85 un-initialed suras. Calculate the sum of verse numbers in each sura ($1 + 2 + 3 + \dots + n$).

[2] If you consider Sura 9 to consist of 127 verses, the Grand Total is 147877, or 19×7783 .

NEW DISCOVERY

[1] The false injections are verses 128 & 129 of Sura 9. The digits here are 1, 1, 2, 2, 8, & 9.

[2] Take all the verses of the Quran from 1:1 to 114:6. Look at all the verse numbers.

[3] Add all the "1's" your eyes see, all the "2's", all the "8's", and all the "9's."

[4] The Grand total, if you consider Sura 9 to have 127 verses, is 5928, 19×312 . Of course, if you included 128 and 129, the total would be $5928 + 1 + 2 + 8 + 1 + 2 + 9 = 5951$, not a multiple of 19.

NEW DISCOVERY

The Quran contains suras whose numbers are odd, and their number of verses is odd or even. Also, the even numbered suras may contain an odd number of verses, or an even number of verses. Thus, there are only 4 possible combinations: Odd & Odd, Odd & Even, Even & Odd, and Even & Even. Sura 9 belongs in the Odd & Odd category since it is an Odd-numbered sura with an odd number of verses (127). Take all the odd-numbered suras which contain an odd number of verses. These suras and their verse numbers are: Sura 1 (7 Verses), 9 (127), 11 (123), 13 (43), 15 (99), 17 (111), 25 (77), 27 (93), 29 (69), 33 (73), 35 (45), 39 (75), 43 (89), 45 (37), 57 (29), 63 (11), 81 (29), 87 (19), 91 (15), 93 (11), 97 (5), 101 (11), 103 (3), 105 (5), 107 (7), 111 (5), and 113 (5). If you add all these numbers, the Grand Total is 2774, 19×146 . Of course, if you take Sura 9 as consisting of 129 verses, this remarkable phenomenon would be destroyed. {End Mahmoud Abib's discoveries.}

Due to lack of space, I will publish an awesome new discovery by Abdullah Arik in the January issue IN SHAA ALLAH.

The Quran Declares: IF YOU DISBELIEVE IN GOD'S MESSENGER OF THE COVENANT YOU ARE NO LONGER A MUSLIM

Read it for yourself:

[1] Verse 81 of Sura 3 clearly informs us that after all the prophets (Nabis) have come to this world, and all the scriptures have been delivered, the Messenger of the Covenant (Rasool) will be sent to confirm all the prophets, remove all innovations, and restore all the scriptures.

[2] Verses 33:7 and 33:40 tell us that the Prophet Muhammad was the final prophet, not the final messenger, that Muhammad was one of the prophets who made the pledge to believe in and support God's Messenger of the Covenant, and that God's Messenger of the Covenant will come after Muhammad.

[3] Verse 82 of Sura 3 informs us that anyone who rejects the Quranic truth predicting the advent of God's Messenger of the Covenant (as stated in 3:81) is an evil person. Read it for yourself.

[4] The next verse, 3:83, tells us that the rejectors of God's Messenger of the Covenant do not belong in God's religion (Islam). Read it for yourself.

[5] The next verse, 3:84, commands us to make no distinction among God's messengers.

[6] The next verse, 3:85, emphasizes that the rejectors of God's Messenger of the Covenant are no longer Muslims. Read it for yourself.

[7] Please note that the total of these numbers (3 + 81 + 82 + 83 + 84 + 85) is 418, or 19×22 .

At the Annual Meeting of Orientalists: MOHAMMEDANS FIGHT GOD'S MIRACLE

At the 1988 meeting of the American Middle East Studies Association, Beverly Hills, California, November 1988, Dr. Ernest Hamilton of the Chicago Theological Seminary presented a paper entitled: "The Quran: A Message & a Methodology". In this paper, Dr. Hamilton basically stated that the Quran is the product of "Muhammad's internal hallucinations," and that the Quran is "fallible." Immediately after Hamilton's paper, I presented my paper on the Computer Analysis of the Quran's text, and I proved beyond doubt both the divine source and perfect preservation of the

Quran. Can you guess who the Mohammedan scholars attacked??!! Yes, they attacked God's miracle, not Dr. Hamilton. Dr. Assad Basool and his cronies from the American Islamic College, also of Chicago, attacked me instead of Hamilton!!! Basool claimed that every letter with a "shaddah" must be counted as two letters. Thus, the conclusion according to Basool is: "There is no mathematical miracle in the Quran!!!" Basool is that enemy of God who insists that "Muhammad" must be written with 5 Arabic letters!!!! Please read 19:68-70 & 41:28; also 23:110.
